

**VAULTASTIC**

The easiest and safest Email backup for Office 365, G Suite (Google Apps), MS Exchange, Lotus Domino, Zimbra and other email servers.

# Safeguard email on a secondary storage

A journaling or mail forwarding configuration on the primary domain is done to forward a copy of every incoming and outgoing mail to a corresponding domain on the Vaultastic servers hosted on the AWS cloud. On Vaultastic, the mails are delivered to the secure and tamper proof mailboxes on the vaultastic domain.

# Self service portal

Lost or deleted mail can be directly accessed from the Read Only Archive account on Vaultastic via the self service portal. User's can search for any mail sent and received till date and forward the mail to the original email id to receive it in the Inbox. In addition, the entire mailbox can be retrieved in either the PST format, suitable for restoration into MS Outlook, or a collection of EML files for restoration into the Thunderbird client.

# Servicing compliance requests

Vaultastic can be used to serve compliance requests from authorities by locating the required mail from the user's Vaultastic account, downloading them and sending the collected emails to the authorities. If required, the entire mailbox of a user can also be retrieved and shared with the authorities.

Vaultastic can be easily administered via a secure web console, which allows the administrator to provision, configure and manage users and security policies like password policies, account lockout, access rights etc.

# Primary Email Platforms Supported

- G Suite (Google Apps)
- Office 365
- MS Exchange (Hosted and In-premise)
- Mithi SkyConnect
- Mithi Connect Xf
- Zimbra
- Mdeamon
- Postfix
- Lotus Domino
- Others (supporting a form of mail journaling)

## **Unlimited Storage**

No storage based plans or limits. Simple retention based plans with unlimited storage.

## **99.999999999999% Data Durability**

Your emails are archived in a cloud storage with multi-layered security making it one of safest email vaults out there.

## **Tamper Proof**

Vaultastic is safe from accidental or malicious deletion of mail and user accounts.

## **DIY**

Self Service portal helps users serve themselves - reply, forward, download, print and export, without having to queue their requests with the IT help desk. Resulting in greater team productivity.

## **Quick Retrieval**

Search and select to forward or download mail from the archival eliminates the need to download/export entire mailboxes to retrieve a select few mail.

End user access	
• Web Client	
• POP	
• IMAP	
Self service	
• Search and Sort	
• View Mail
